

## DISPLAY SYMBOLS ON THE RFID READER

Hold the card in front of the contact sensor til the hourglass symbol disappears and the green battery symbol appears.

Battery symbol lights up green:  
charging in progress

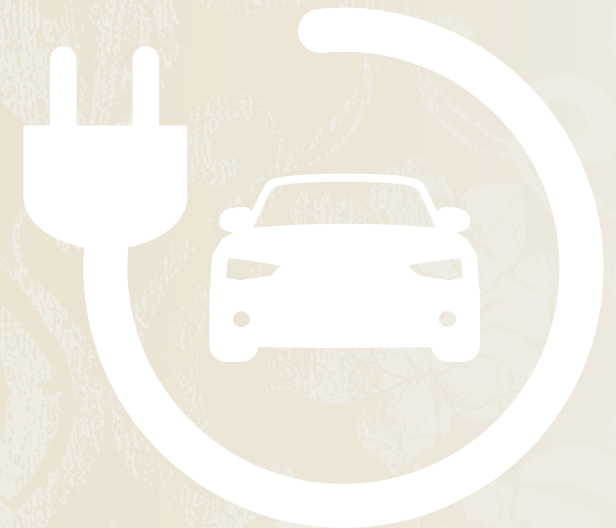

To start the charging process, simply hold the charging card to the charging stations' RFID contact sensor and plug the charging cable into the car. You have one minute's time between scanning the card and plugging the car in. Alternatively you can plug the charging cable into the car first and then scan the card.

# TIPS FOR USING THE CHARGING STATIONS

In order to allow our guests to charge their electric or hybrid vehicles, we have installed 16 modern wallboxes in cooperation with deer GmbH. How to use them and payment methods are explained step by step in the following. Please do not hesitate to contact our team at reception should you have any questions.

## CHARGING IN THREE EASY STEPS

### 1 ACTIVATING THE CHARGING STATION

A) EITHER ACTIVATE THE STATION USING YOUR OWN CHARGING CARD:

Hold your charging card against the RFID sensor on the front of the charging station.

B) OR ALTERNATIVELY: ACTIVATE THE STATION BY SCANNING THE QR CODE AND PAYING BY CREDIT CARD:

Scan the QR code on the wallbox with the camera on your smartphone and follow the instructions that appear. Your credit card will be charged with a €150 deposit, along with the electricity and stand costs.

### 2 CONNECT WALLBOX AND VEHICLE

### 3 UNPLUG THE CHARGING CABLE AND RETURN TO THE HOLDER ON THE WALLBOX.

1 Hold the charging card up to the RFID reader or scan the QR code on the wallbox with your smartphone camera.

2 Connect wallbox and vehicle.

3 Unplug the charging cable and return to holder in the wallbox.

## STARTING, STOPPING AND ENDING THE CHARGING PROCESS

After activating the wallbox, the charging process will automatically start as soon as the charging cable has been plugged into the charging socket of your vehicle. You can stop the charging process at any time by removing the charging cable. Please end the charging process yourself as soon as your vehicle is sufficiently charged.

If you have not booked a permanent parking space with a charging station and are using one of our free e-parking spaces, we kindly ask that you only use the parking slot for the duration of the charging process. Please also be aware of potential additional stand fees which may be charged by your contract partners for the charging card.

## STAND FEES

Avoid leaving the charging cable plugged into your car once the vehicle is fully charged, otherwise you will be charged by your contract partner.

## TARIFF

As the tariffs are agreed between your contract partner and deer GmbH, we cannot offer you a fixed price/kWh. All wallboxes in the Bareiss charging stations charge with alternating current (AC).

## CONTRACTUAL PARTNERSHIP AND BILLING

The operator of the e-charging stations is deer GmbH. Billing takes place directly via our cooperation partner. [www.deer-mobility.de](http://www.deer-mobility.de)
